

This Self-Help document is intended to introduce you to two Harcourt Applications: Splash into Phonics and Comprehension Expedition.

Opening your 'My Applications' folder found on your desktop you will notice three new icons/shortcuts (only two if you are a K - 5 Student). (see below)

While there are two Application Icons representing the two applications they are actually integrated into one common application. Therefore, you can double click either icon to have access to both Applications. (see below)

Upon login you and your students will have the opportunity to select either feature: Phonics or Comprehension and then begin to work through the various levels of either tool.

For quick access to either program you can click the 'Guest' button in the lower right hand corner and proceed from there. Else you will need to identify yourself with a username and password.

To setup the environment for your class and your students will require additional reading and this is found in the 'Harcourt Instructions' folder within your 'My Applications' folder. (see below)

To login to the application with the 'Super User' account please open the 'First Time Login...' read me file. Once you login you can read from the additional Teacher Guides to setup your class and enable any other features as necessary.
